

Usage of the table: columns show motor sets, rows show telescopes.
 If you need a fitting motor, start by finding your telescope in the row. Then look to the right in which column a motor is shown as fitting (✓). The column heading names the motor.
 If you have a motor and want to know which telescopes it fits to, do it the other way: Find the column with the motor, then go down and find fitting telescopes in the lines.
 A ✖ indicates that telescope and motor will not fit out of the box, but some modifications have to be made.

Telescope	Product ID	Motor set					
		Omegon tracking motor for 2 and EQ-3	Omegon Tracking motor for 150/750 EQ-3 mount	Seben RA Telescope Motor Drive + Hand Controller M4 for EQ3 / EQ2 mount	Omegon RA motor set for EQ-3 and EQ-4	Zoomion RA motor drive set for Genesis 200 EQ mount	Omegon EQ-320 tracking motor set
